

One Solution.

Today, you can have an exceptionally reliable document processing system for what an ordinary copier would cost—a system that transforms the way you manage documents. Introducing the KM-3530 Imaging System.

Kyocera Mita took the time to listen to the people in the trenches who actually do the work—business professionals like you, who know that even in a digital world, hardcopy documents still matter.

With a KM-3530, you can produce those documents in the format you choose, hardcopy or electronic, and seamlessly integrate the Unit into your workflow.

Start with a fast, fully-featured 35 CPM Copier. Add options like a 100 Sheet Document Processor, Stackless Duplexing, Stapling and additional paper handling that raise office efficiency and convenience...speedy faxing, and scanning for comprehensive document creation, duplication, and distribution from the desktop—now, or when the demands increase.

Best of all, the KM-3530 is backed by Kyocera Mita's legendary reputation for durability and reduced routine maintenance, ensuring the timely delivery of your information.

The new KM-3530 does it all, from one place—from One Company, Kyocera Mita.

KM-3530

KM-3530

Many Demands.

KM-3530

Shown with optional Document Processor, 3,000 Sheet Paper Deck and Finisher.

As a Copier, the unit delivers extraordinary output, with 600 dpi resolution and 256 levels of gray. With standard Dual 500 Sheet Paper Drawers and a 200 Sheet Multi-Purpose Tray, you can achieve amazing results onto a variety of paper sizes and stock, including 110 lbs. And this is just the beginning.

Copy the Document

The KM-3530 brings a tremendous amount of functionality and versatility to the workplace.

Print the Document

Connected to your network, the KM-3530 improves the workflow of any workgroup by providing all of the advanced imaging capabilities of the unit at your desktop. You'll not only improve productivity, you'll significantly reduce your printing costs.

Scan the Document

Converting paper-based documents into electronic documents that can be shared, stored, retrieved and distributed by everyone in your organization is as easy as making a copy.

Fax the Document

Here's a convenient and economical way to upgrade/supplement your current facsimile capabilities. With the KM-3530's Fax/Network Fax option, you can send and receive documents from the Unit or your desktop with ease.

Scan over 100 letter size originals to memory, walk away, and let the Copier do the rest. **Electronic and Rotate Sorting** allows you to collate sets electronically, eliminating the expense of an add-on sorting device.

With **Booklet Mode**, it's easy to create signature style booklets from sheet originals without copy waste.

Batch Copy lets you combine sheet and bound originals and output as one document, saving time and effort.

Auto Image Rotation matches your letter size originals with the letter size paper available, reducing copy waste. What's more, you can reduce oversize originals to letter size copies without any slowdown.

Receive email notification of Printer status, including paper and toner level.

Manage the content of Virtual Mailboxes and Job Lists using **Printer Disk Manager**.

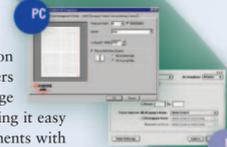

Our optional network-ready **Print/Scan System** connects seamlessly with all popular Network Operating Systems.

A **Wireless** option is also available, allowing placement of the Unit in virtually any location. In addition, Internet Printing is supported.

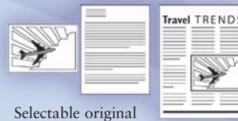

The **KX Driver**, common among Kyocera Mita Copiers and Printers, supports all Page Description Languages, making it easy for everyone to print documents with fast 1200 dpi resolution.

Complementing the KM-3530's distinctive Control Panel design is the ultra-wide **Touch Screen Interface**. A combination of large Touch Keys, Text Messages and Graphics makes all feature selections error free. Shortcut Keys and a customizable User Choice Screen means that your most frequently used features are always at your fingertips. Combined with numerous Automatic Feature Selections, copying has never been easier.

Selectable original type and 200 to 600 dpi scan resolution allows for optimum image clarity.

Scan one and two-sided documents, pages from books and magazines to PC's/Mac's as PDF or TIFF files. **TWAIN Driver** enables the immediate use of the image within applications for editing or merging with other documents.

Transmit letter size pages in just 3 seconds per page.

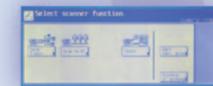

Fax oversized and bound documents from the Platen.

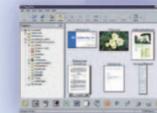

Store up to 530 pages in memory when fully configured.

E-mail using the Address Book Utility, Microsoft Outlook, or simply enter the destination using the Touch Screen Interface.

Included with our Scanning Suite, **PaperPort™ Deluxe** enables you to organize, search, edit and manage scanned documents at your desktop.

A component of our Scanning Suite, the **KM Document Flow System** allows you to quickly Index scanned files on multiple levels from the Copier Control Panel to a selected database.

Solve unique printing applications, create forms, logos and more with our standard **PRESCRIBE PDL**.

Optional **eMPS HDD** adds Job Storage, Secure Mailbox Printing, Proof and Hold, plus Bar Code Printing, streamlining document production within the workgroup.

Using **IC Link**, information like forms, logos, and macros can be stored to a Compact Flash Card, providing portability from one device to another.

Edge Stapling, Saddle Stitching, Hole Punching. You have a choice of **Finishing Options** with the KM-3530.

Optional Saddle Stitcher with Edge Stapling, Center Binding, and Auto V Fold.

Optional Finisher with Edge Stapling and standard 2 & 3 Hole Punch. Shown with 7 Bin Print Mailbox option.

Six different **Imaging Modes**, including **Toner Save**, assures optimum output quality without a lot of copy waste.
