

iR8070
Digital Network
Production System
(MEAP enabled)

Produce high quality, high speed
short-run print work, on demand

Take economical and productive black-and-white document production a step further with the iR8070. This compact yet complete system offers both high quality image reproduction and fast output, at 80 ppm.

Comprehensive finishing capabilities, seamless network integration, a powerful image server and a web-based remote user interface will enable you to fulfil extensive applications effortlessly - whether for in-house corporate document production, CRDs, data centres or the print-for-pay environment.

Embedded within the iR8070 is MEAP, a new Canon developed JAVA based application software platform. MEAP enables additional application functionality to be added to the device at a later stage, ensuring products are completely future proofed. Additionally, it allows customised software applications to be developed to suit bespoke customer requirements.

- Productive 80 ppm output (A4)
- Professional finishing options
- Large paper supply
- Sending Options
- MEAP Enabled
- Compact and durable design
- Easy and reliable operation

Specifications iR8070
